

# BATTLE SIMULATION

## 35HR EVENT GUIDELINE PACKING LIST

The below is a guideline packing list that we recommend for a Warzone 35 hour military simulation event. The items in red are mandatory, everything else is recommended. Failure to bring the correct items to ensure your own safety or wellbeing may result in you being stopped from taking part in the event. Please feel free to print it out and use it to help you pack.

It is entirely up to you how you want to pack your kit but remember that everything you pack you must be able to carry. Some of our events will require you to move by foot to your HQ / FOB that you will use as your base for the rest of the event.

Please clearly mark all items with your name and your team name (if applicable) and we will do our best to return any items that we find post event. If you don't mark your items then we will not be able to get them back to you.

### EYE PROTECTION IS MANDATORY AT ALL TIMES

It is your responsibility to ensure you are correctly equipped and ready for the event. Work on the principal that 'two is one and one is none' and you should be well prepared for anything to go wrong. It is also suggested that you waterproof all of your equipment (especially sleeping bags) in waterproof bags to prevent them getting ruined or unusable.

Remember the 5 P' when packing and preparing and you can't go far wrong.

### PRIOR PREPERATION PREVENTS POOR PERFORMACE

Don't be the person that is a burden on the rest of your team due to your poor admin. Get your admin sorted and be professional.
